# Clementine

## Hand Dishwashing Super Concentrate

- It's one of the most powerful detergents — concentrates on the market — for hand dishwashing, washing and mopping floors and all contaminated surfaces.
- It contains more than 55% active ingredients. When diluted with water, you will get multiple amounts of high-performance detergent.
- Strong foaming with rich and stable foam.
- It has excellent cleaning and degreasing effect.
- When diluted 1:5 with water, you get six times the amount.
- Made in the Czech Republic.
- It's under constant quality control.

**Use:** Dilute 1-part concentrate with 5 parts water in the Free Way Dilution Bottle. Dispense the solution thus obtained into the cleaning bath as usual, pump or you can dos approx. 1 teaspoon for 5 litres of water.

# BULL

## Strongly concentrated cleaning, washing and degreasing detergent

- Suitable for kitchen equipment, dishwashers, cleaning machines, refrigerators, bathtubs, motors, metal, rubber, plastics, floors, tiles, cooker hoods and pool cleaning.
- Removes insect residues from car bodies, degreases and cleans wheels.
- Variability of use - washing, spraying, dipping. Strongly foaming!
- A suds suppressor can be supplied on request.
- Can also be used for steam cleaning under high pressure or when cleaning in ultrasonic equipment.
- When using on aluminium always rinse with water! (don't leave the product on aluminium for too long!)
- Perfectly cleans and degreases fuel tanks.
- The use of hot water increases the degreasing effect.
- Made in the Czech Republic.
- It's under constant quality control.
- (1 litre of BULL) When diluted 1:10 with water, you get 11 litres of strong detergent, which can be further diluted or sprayed with sprayer.

**Use:** Diluted detergent 1:10 leave to act and rinse thoroughly with clean water. At higher water temperature achieves higher cleaning effect. It is possible to dilute according to the level of contamination in a ratio of 1:10 to 1:200. When using on aluminium always rinse thoroughly with water!

# 3★STERN

## Concentrate for sanitary equipment with strong cleaning additive

- Detergent that cleans all sanitary facilities: bathtub, sink, toilet bowl, urinal, wall panelling, floors and more.
- Removes lime deposits on toilet bowls, washbasins and bathtubs in a gentle way.
- Deodorizes through the pleasant long-lasting aroma of our product.
- Non-flammable contains citric acid.
- Made in the Czech Republic.
- It's under constant quality control.

**Use:** The sanitary appliance with cleaning agent 3 STERN is applied diluted 1:10 on the surface to be cleaned, left to act for 15-30 minutes and rinsed with clean water. The surface does not need to be dried. For lime deposits, it is recommended to remove the loose coating with a brush or a sponge after an appropriate exposure time. The diluted product in the dilution bottle must be shaken well before use!

We recommend using our "dilution bottle with dilution dipstick" and our sprayers (plain or high quality with metal nozzle).

# CLEAN

## Super concentrate for cleaning glass and smooth surfaces

- Super concentrate for cleaning glass, windows, mirrors and smooth surfaces including plastics and laminate furniture at an unbeatable price after dilution.
- Before use, it is necessary to dilute with water in a ratio of 1:20 (from one litre of concentrate by dilution 1:20 you get 21 litres of highly effective product).
- It contains NO fragrances or dyes.
- It cleans with its rich foam.
- We recommend diluting in our FREEWAY plastic spray bottle with sprayer and scale.
- It is completely non-flammable.
- Made in the Czech Republic.
- It's under constant quality control.

**Use:** Dilute 1 part of CLEAN concentrate with at least 20 parts of water in the "FREEWAY" dilution bottle (line 1:20).

Stronger concentration can leave white spots on the surface to be cleaned! Spray the solution thus obtained with a foam spray onto the surfaces to be cleaned and wipe off.

# OCEAN

## OCEAN

Osvěžovač vzduchu

## OCEAN

Osvěžovač vzduchu

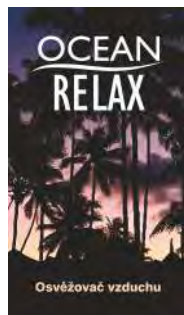

## OCEAN

Osvěžovač vzduchu

### Air freshener with cleaning ingredient

- Fresh pleasant smell.
- It is an excellent product for cleaning and refreshing the air. At the same time, its cleaning component ensures that most dust parts are removed.
- It perfectly absorbs cigarette smoke and various unpleasant odours with its cleaning component.
- It can be used in homes, kitchens, living rooms, bedrooms, toilets, offices, hospitals, clinics, senior homes and many other areas where it is necessary to ensure a pleasant smell, eliminate the spread of dust and unpleasant odours.
- Biodegradable and very environmentally friendly.
- It is completely non-flammable.
- This preparation isn't considered dangerous.
- Made in the Czech Republic.
- It's under constant quality control.

**Use:** Spray the air freshener OCEAN into the area of the treated room. Do not spray over flowers and furniture! For the best application, we recommend using a "metal sprayer" from our range, or a 125 ml spray bottle with an Ocean label.

# FLECKEX

## Stain remover

- Special highly effective agent for removing blood stains, grease and ink from laundry, textiles, upholstered furniture, carpets, etc.
- Composed of special substances that remove stains not only from the surface but also from the depth of the material.
- It does not contain phosphates or chlorinated hydrocarbons.
- Made in the Czech Republic.
- It's under constant quality control.

**Use:** Apply FLECK EX to a contaminated area using a sprayer and leave for 10-25 minutes. Then wash the treated laundry as usual. For carpets or upholstered furniture, you apply and leave the remover for 10-25 minutes, then thoroughly wash it with water using a sponge (do not brush) and allow it to dry.

# LAVABELL

## Concentrated liquid laundry detergent

- Suitable for all textile fabrics intended for washing at temperatures from 30-95 ° C.
- Can be used for washing machines as well as for hand washing. The effectiveness of the product does not depend on the hardness of the water.
- It does not contain phosphates, bleaches, optical brighteners or enzymes.
- It is a foaming concentrate without dyes.
- Made in the Czech Republic.
- It's under constant quality control.

**Use:** For washing white linen, it is used in combination with Free Way bleach. For particularly difficult stains, use the Free Way stain remover. For dosing we recommend using the Free Way pump for dosing. Based on 4,5 kg of dry laundry. The product is used undiluted:

**Prewash** - 1,5x press (6 ml),  
**Main wash** - 3x press (12 ml),  
**Hand wash** - 1x press (4 ml)

The efficacy of LAVABELL is not dependent on the hardness of the water - it can be used in the hardness range of 0° - 40° dH. LAVABELL is 100% biodegradable (attestation BS 21/93 - Austria, trial period 2 weeks).

# GEPARD SR

## Concentrate - product for cleaning and washing floor coverings

- Special cleaner for all smooth types of floors and floor coverings, linoleum, plastic coverings, PVC, wood, marble, stone, tiles.
- Intended for heavy contamination and general cleaning.
- It contains special substances that increase the effect of GEPARD HV polishing product.
- When diluted 1:10 with water, you get a total of 11 litres of strong detergent from 1 litre of concentrate. Then add it to the washing bath.
- Made in the Czech Republic.
- It's under constant quality control.

**Use:** Depending on the level of contamination, dilute the GEPARD SR concentrate in a ratio of 1:10 (with heavy contamination), 1:20 (for medium contamination) up to 1:30.  
In case of heavy soiling, let GEPARD SR act for 5-10 minutes. Then wash the floor with warm water.

# GEPARD HV

## Floor polishing agent

- Product with high self-polishing effect, lasts for several months.
- Designed for all smooth surfaces - rubber, plastic floors, pvc, wood, marble, tiles and stone.
- It gives the surface a high degree of protection against mechanical damage, although the surface is smooth it's not slippery.
- Protects treated surface by creating a glossy film that encloses the treated surface.
- Prevents dirt and water from entering the floor surface.
- It does not change the colour of the substrate and is antistatic.
- It can be applied on the floor by machine.
- Made in the Czech Republic.
- It's under constant quality control.

**Use:** GEPARD HV is used on previously cleaned (preferably GEPARD SR concentrate cleaning agent) and dry surface. Then apply it (diluted) with dispenser to the surface and rub it with a cloth or sponge evenly to form a fine film. Leave to dry for about 20 minutes. If this is first time, then repeat the whole procedure once again.  
The floor is further treated only by washing with water.

# SIAM

## Universal detergent (concentrate)

- Highly foaming multi-purpose concentrated cleaner for the whole household.
- It has an excellent cleaning effect.
- Can also be used for washing and rinsing dishes.
- Designed for all surfaces and all types of floor coverings.
- For its versatility makes SIAM an ideal travel companion.
- Made in the Czech Republic.
- It's under constant quality control.

1:100

**Use:** Depending on the level of contamination or intended use — should be SIAM diluted 1:10 (for very heavy contamination) or 1:20 to 1:40 (for medium contamination or mopping) or 1:100 (for light contamination) or rinse). Original FREE WAY bottles with scale can be used to dilute the product.

# TERRA

## Concentrate to remove calcium deposit

- It is a quick and efficient way to remove lime deposits and scale from coffee machines, dishwashers, washing machines, kettles, bathtubs, steam engines, toilet water tanks, etc.
- It does not contain phosphates or acetic acid.
- Contains citric acid.
- When diluting TERRA concentrate with water in a ratio of 1:3 you get a total 4 litres of strong detergent from 1 litre of concentrate.
- Made in the Czech Republic.
- It's under constant quality control.

1:10

**Use:** Depending on the amount of deposits, dilute the TERRA concentrate with water in a ratio of 1:3 to 1:10. Fill the object to be cleaned with this solution, or apply the agent to the surface to be cleaned. After a few seconds, the product begins to work, which results in the formation of tiny bubbles. Leave for 15-30 minutes or allow the self-cleaning cycle of the machine according to its instructions and then rinse thoroughly with clean water.

In case of strong deposits, we recommend repeating the procedure 2-3 times.

**Coffee machine:** Fill the water tank with TERRA diluted 1:3. Clean the machine according to the appliance manufacturer's instructions. Then rinse the tank with clean water.

# B.G.S. SPECIAL

## SUPER CONCENTRATE - a product for removing burnt stains

- Special very powerful concentrated cleaning agent for gas and electric furnaces, ceramic plates, ovens, grills, deep fryers and more.
- Strong degreasing and cleaning effects to remove all burn stains.
- High cleaning power to remove burnt fat, food scraps and dirty crusts
- Made in the Czech Republic.
- It's under constant quality control.

**Use:** Agent B.G.S. apply with a sponge on a cold or slightly warmed surface to be cleaned and leave for a while. Then wipe with a cloth or scraper and rinse thoroughly with clean water. Depending on the degree of contamination it can be used in concentrated form or diluted 1:3 to 1:10 with water. For dilution we can use our FW scale bottle.

## Fireplace insert glass cleaner

## SUPER CONCENTRATE for glass cleaning of fireplace inserts

- One of the most powerful and effective products on the market.
- Special concentrated cleaning agent for smoky and dirty fireplace inserts and stoves.
- Strong degreasing and cleaning effect.
- Made in the Czech Republic.
- It's under constant quality control.

**Use:** Agent B.G.S. can be used depending on level of contamination also in concentrated form or diluted with lukewarm water in a ratio of 1:3 to 1:10. The product is evenly spread on the glass surface of the fireplace insert and allowed to act for a while. We recommend applying and cleaning with a sponge for washing dishes. The loose dirt is then wiped off with a clean cloth or paper towel. We recommend using the FREE WAY graduated bottle for dilution. DO NOT use in areas where glass is coloured. DO NOT use on aluminium mouldings.

Always wear protective gloves.

# KONCENTRÁT NA ČISTĚNÍ PIL

B.G.S. SPECIÁL

## SUPER CONCENTRATE for saw cleaning

- One of the most powerful and efficient saw cleaners on the market, diluted with water.
- Special agent for cleaning burnt resin.
- Strong degreasing and cleaning effect.
- The recommended dilution is 1:3, 1:10, 1:40 and possibly more depending on the level of contamination and the washing procedure selected.
- Possible ways of application: spray application on the treated area, let it act and clean + rinse and treat against corrosion (wash - let act and clean + rinse and treat against corrosion) by immersion in a bath.
- Can also be used in automatic dishwashing machines, but with the addition of a suds suppressor (available).
- Made in the Czech Republic.
- It's under constant quality control.

1:40

**Use:** Agent B.G.S. can be used depending on level of contamination also in concentrated form or diluted with lukewarm water in a ratio of 1: 3 to 1:10- 100. For dilution we can use our FW scale bottle.

Cleaning efficiency is increased by using hot water. The product is equally applied and spread over the surface to be cleaned, or the cleaned object can be soaked in a bath of B.G.S. and water.

# CLUB

## Plastic and glass cleaning agent

- Plastic and glass cleaner CLUB is specially developed for cleaning plastics, glass, plexiglass, plastic surfaces on furniture, plastic surfaces of cars, etc.
- Perfectly cleans and degreases glass in copiers and scanners.
- Removes grease, tobacco smoke, stamp ink, adhesive residues, toner paint and other dirt from the surface.
- It does not leave streaks and has antistatic effects.
- It cleans well dioptric glasses and sunglasses.
- Made in the Czech Republic.
- It's under constant quality control.

**Use:** Using the spray valve, CLUB is sprayed undiluted on the surface to be cleaned and wiped with a clean dry cloth. CLUB should only be sprayed onto a paper towel or cloth to clean the surface if there's a risk of leakage and thus damage to the object to be cleaned, In the case of heavy contamination the procedure can be repeated several times.

# BRASIL balsam

## Cleaning and conservation of furniture

- Excellent product for the overall treatment of furniture which not only cleans but also conserves. Using quality oil that gives the furniture a fresh look and a natural scent.
- Due to its gentle features, the product is used for the treatment of old furniture, mainly in castles, palaces, museums and directly in the restoration workshop.
- Can be used for many light wood types as well as for painted surfaces and all wood surfaces. In case of doubt, we recommend testing the device in a hidden place.
- It gives the treated surfaces a shine and has an antistatic effect.
- Contains bright dye that retouches scratches in furniture.
- It does not contain waxes and therefore does not adhere to the treated surfaces.
- The product contains quality fresh perfume.
- Made in the Czech Republic.
- It's under constant quality control.

**Use:** Apply BRASIL undiluted with a cloth on the treated area and rub in the surface with circular movements.

# DRACO

## Insecticide - agent for killing crawling insects

- It's approved biocide REG-33.7.1-30.5.05/18831
- It works against crawling insects - ants, mosquitoes, flies, wasps, spiders, moths, cockroaches, fishponds, fleas, ticks, toadstools, etc.
- It has a liquid consistency; 1 litre of solution is enough for approximately 50 m of treated area.
- To achieve the desired effect of the effect, treat approx. 20% of the space.
- Made in the Czech Republic.
- It's under constant quality control.

**Attention! This product is dangerous to fish and bees.**  
**Do not allow to enter surface water or drains.**

**Use:** Spray the product undiluted to areas that are popular for unwanted insects such as slits, floors, corners. The exposure time is about 15 days. Do not apply to food, beverages, etc. Cover aquariums and food when using.

# LAVAMAT

## Liquid SUPER CONCENTRATE for dishwashers

- Strongly alkaline cleaning concentrate intended exclusively for use in dishwashers.
- Effectively removes grease, fat and food residues.
- It doesn't contain any phosphates or chlorides.
- Specially matched to LAVABRILLO (dishwashing agent)
- Made in the Czech Republic.
- It's under constant quality control.

určený pro mycí automaty

**Use:** Moderate contamination: approx. 1-4 ml of product. If the water hardness is higher, the dosage should be increased, or the dosage of regenerating salt should be adjusted. Refer to the manufacturer's instructions for water consumed in the dishwasher during the wash cycle.

# Royal

## FOAM CONCENTRATE for cleaning upholstery, carpets and decorative textiles

- A special, water-based compound that was developed for easy cleaning and care of upholstery, carpets and all decorative textiles.
- The detergent provides a very stable and fine foam throughout the cleaning. Cleaning ability has been tested in laboratories.
- After cleaning, it doesn't leave sticky residue on the carpet fibres and thus prevents the carpet from being contaminated again.
- A special recipe ensures that dirt is not caught on the fibres and other stains or contamination is easier to remove.
- When diluted 1:10 with water, you will get in total 11 litres of a highly effective product from 1 litre of concentrate.
- Made in the Czech Republic.
- It's under constant quality control.

**Use:** The ROYAL cleaning concentrate is diluted with warm water in a minimum ratio of 1:10 (possible even more according to need and contamination). Then use the product to clean upholstery or carpets. Can be used manually or in a machine cleaner. **ATTENTION:** This product is very foaming!

# Danča

## Foaming / Non-foaming concentrate for carpet and upholstery cleaning

- Special water dilutable blend of polymers and surfactants, developed for easy cleaning and care of upholstery and carpets.
- After drying, it exhibits a very hard and brittle structure, which prevents the fiber from being contaminated again.
- The detergent provides a very stable and fine foam throughout the cleaning. Cleaning ability has been tested in laboratories.
- After cleaning, it does not leave sticky residue on the carpet fibres and thus prevents the carpet from being contaminated again.
- A special patented recipe ensures that dirt does not get caught on the fibres and other stains or contaminations are easier to remove.
- Made in the Czech Republic.
- It's under constant quality control.

1:10

**Use:** Danča cleaning concentrate is diluted with warm water in a minimum ratio of 1:10. Then use the product to clean upholstery or carpets. Can be used manually or in a machine cleaner.

# LAVABRILLO

## Polishing agent for dishwashers (concentrate)

- Special product intended for rinsing glass and dishes in automatic washing machines.
- Contains special ingredients to prevent calcium deposits on the cookware surface even during drying.
- It leaves the dishes shiny, spotless and removes the unpleasant odour of chlorine and food debris.
- Easily degradable and environmentally friendly.
- It's under constant quality control.

1:5

**Use:** **For smaller operations:**  
We recommend 0,3 - 0,4 ml of concentrate for approx. 5 l of water.  
If the water hardness is higher, the dose should be increased.

### For larger operations:

We recommend 0,3 - 0,8 ml of concentrate for approx. 1 l of water.  
If the water hardness is higher, the dose should be increased.

### Dosage for descaling:

It is recommended to dilute 1:5 (1-part concentrate to 5 parts water) from coffee machines and similar equipment.

## Car wash - concentrate

- Concentrated washing agent for motor vehicles containing approx. 55% of active substances. It is one of the strongest concentrates on the market.
- It's intended for manual or mechanical washing of the whole body of all motor vehicles, including plastic parts and tires.
- Can be used on all types of varnishes.
- It has a strong foaming effect.
- It dissolves all common impurities such as mud, oil residues, etc.
- It removes operating dirt from the body and prepares the car surface for further polishing and preservation.

**Use:** Rinse the car thoroughly with coarse dirt and dust before using the PS GALA Shampoo. This will prevent the paint from being scratched. Dilute PS GALA shampoo with lukewarm water according to the degree of contamination in the ratio 1:10 to 1: 100.  
Then wash the car properly (never let the foam dry!), Rinse with clean water and make sure it's completely dry.

## diamond cooling gel

## Cooling gel DIAMOND POLARGEL, 200 g

- It is an oil-free gel based on natural ingredients of menthol and camphor with a refreshing, cooling and perfusing effect.
- Fast absorption through the skin.
- Ideal for use after work or sports.
- Relieves muscle and joint pain with a cooling effect.
- Made in the Czech Republic.
- It's under constant quality control.

**Use:** Apply enough DIAMOND gel to tired areas and massage in a circular motion. It can be applied to the skin several times a day. Repeat as necessary. Quality massage will increase the effect of DIAMOND gel.

**Warning:** Not suitable for children under 3 years! Keep out of reach of children. Always keep in the original packaging! Do not use internally! Do not use on damaged and injured skin! Protect your eyes and mucous membranes!

## Dilution bottle FREE WAY with scale - bottom part

- Plastic bottle "FREE WAY" with 0.5 litre dilution scale and 28 mm thread.
- It has an auxiliary line for diluting the concentrates with water 1:10 and 1:20.
- The scale on the bottle goes from 0, 50, 100 up to 500 ml
- This bottle is designed for all our sprayers (spray valve)
  - catalogue number "1001" furthermore a metal nozzle atomizer
  - catalogue number "1003" and dosing pump catalogue number "1002")
- Dilution bottle warranty is 2 years.

## Spray valve for FREE WAY dilution bottle and for 0.5 and 1 litre products

- Spray valve for FREE WAY dilution bottle and for products in packaging PE bottle of 0.5 and 1 litre.
- The sprayer is designed for a thread of 28 mm.
- We provide a two-year warranty on the sprayer.
- If the sprayer stops working, we recommend removing it from the bottle and immersing it in warm water overnight. In most cases is the sprayer functional again.

## Spray valve with metal nozzle for FREE WAY dilution bottle and for 0.5 and 1 litre products

- High quality mechanical spray valve "with metal nozzle" for FREE WAY "dilution bottle" and for 0.5 and 1 litre products.
- Excellent fogging.
- With this sprayer we recommend applying our product OCEAN - air freshener.
- It is intended for professional and regular daily use.
- These quality sprayers are currently available in green colour.
- The sprayer is designed for a thread of 28 mm.
- We provide a two-year warranty on the sprayer.
- If the sprayer stops working, we recommend removing it from the bottle and immersing it in warm water overnight. In most cases is the sprayer functional again.

## Dilution spray bottle - complete

- New 0.5 litre plastic spray bottle with sprayer. It is provided with a 50 ml sticker for easy dilution of concentrates. Marks for simple 1:10 and 1:20 dilution.
- The sprayer is designed for a thread of 28 mm.
- Dilution bottle warranty is 2 years.
- If the sprayer stops working, we recommend removing it from the bottle and immersing it in warm water overnight. In most cases is the sprayer functional again.

## Spray bottle and label DRACO, FLECK EX, CLUB, OCEAN, capacity 125 ml.

- Empty plastic 125 ml bottle with spray and label e.g. DRACO, FLECK-EX, CLUB, OCEAN - air freshener.
- Designed for spillage and application of DRACO, FLECK-EX, CLUB, OCEAN - air freshener.
- Spray bottle warranty is 2 years.
- If the sprayer stops working, we recommend removing it from the bottle and immersing it in warm water overnight. In most cases is the sprayer functional again.

## 3.5 or 10 litre canister filling valves

- 3, 5 or 10 litre canister filling valves.
- The contents of the canister can be conveniently poured using our valve.
- Always store the canisters upright!
- We provide a two-year warranty on the product.

## 25 l canister filling valve

- 25 l canister filling valve.
- The contents of the canister can be conveniently poured using our valve.
- Always store the canisters upright!
- We provide a two-year warranty on the product.

## 3, 5 or 10 l canister dispensing valves

- 3, 5 or 10 litre canister dispensing valves for easier handling and dilution.
- We provide a two-year warranty on the product.

## Dispensing valve for dilution bottle FREE WAY and for 0.5 and 1 litre products

- Dispensing valve for "FREE WAY" dilution bottle and for our products in 0.5 and 1 litre packs.
- It's designed for a thread of 28 mm.
- We provide a two-year warranty on the product.
- If the sprayer stops working, we recommend removing it from the bottle and immersing it in warm water overnight. In most cases is the sprayer functional again.
